DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter.

Claims 1, 12, 16 recites, inter alia, "displaying a user interface from which a user selects... a type of remote copying path; and automatically generating and displaying available adapters compatible with said type of remote copying path via the user interface, through which a path can be established between the selected storage resource and the selected target storage resource", and "a list of the available adapters displayed on the user interface being dynamically updated as a function of at least detecting one or more failed or newly established paths through the available adapters or detecting an adapter reconfigured to a protocol that is not handled". Prior art of record do not teach or suggest, either alone or in combination, the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.
